The main content layer

combined

The main content page or current selected page, provides user navigation and access to the content in the system, arranged by most relevant content and search. The main content page is the central hub for the user to explore content. It features a search bar, navigation tabs, and a main content area. The content is organized into sections, such as 'My Community', 'My Community - Loading Method', and 'My Community - User's Community'. The page is designed to be user-friendly and easy to navigate.

The main orientation layer

location

The main orientation layer provides a geographical context for the content. It includes a map of the United States and a list of locations. The map is interactive, allowing users to click on different locations to view more details. The list of locations is also interactive, allowing users to filter and sort the results. The orientation layer is designed to be intuitive and easy to use.

The main navigation layer

community groups

The main navigation layer provides a structured way for users to explore the content. It includes a 'Main Navigation Map' and a 'User Map'. The navigation map shows a hierarchy of content, while the user map shows the user's current location and available options. The navigation layer is designed to be clear and consistent across all pages.

Support Functionality

Support Functionality

Support Functionality

Support Functionality

The support functionality layer provides additional features and tools for users. It includes a 'Support Functionality' section with various options and a 'Support Functionality' section with a list of items. The support functionality layer is designed to be easy to use and provide a good user experience.
